LEADER RELOADED

The ELARD conference on the heartbeat
of the LEADER community

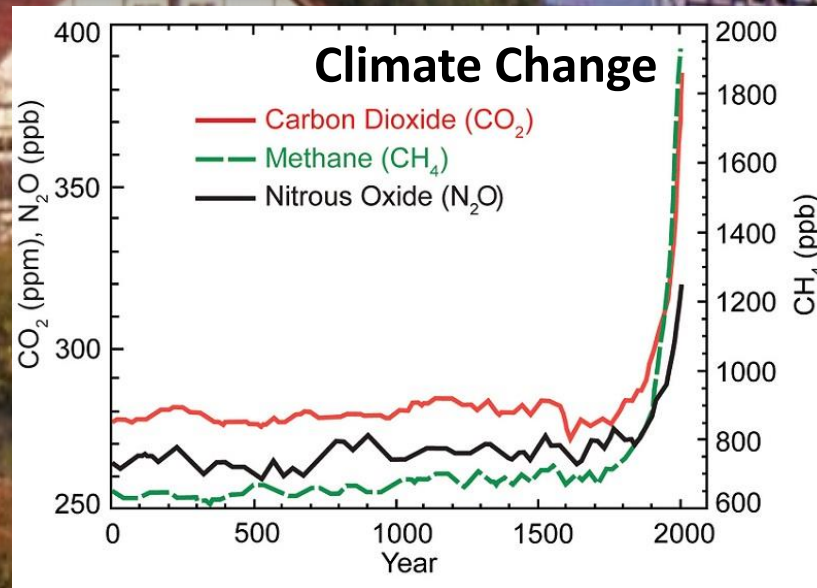

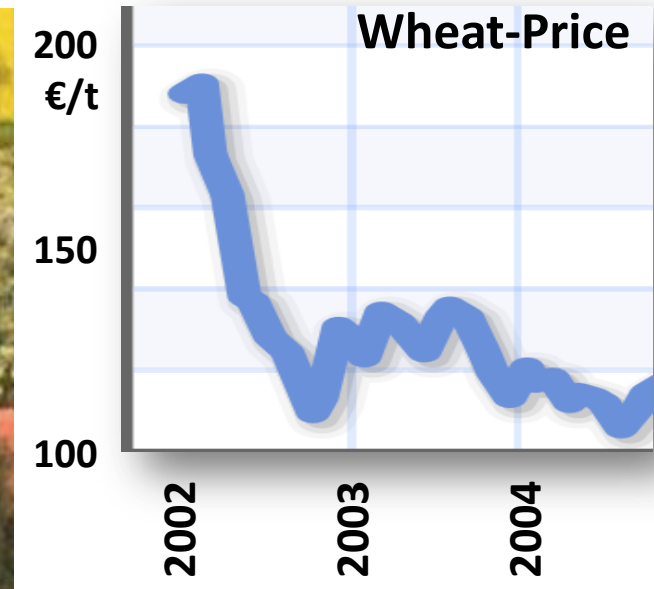

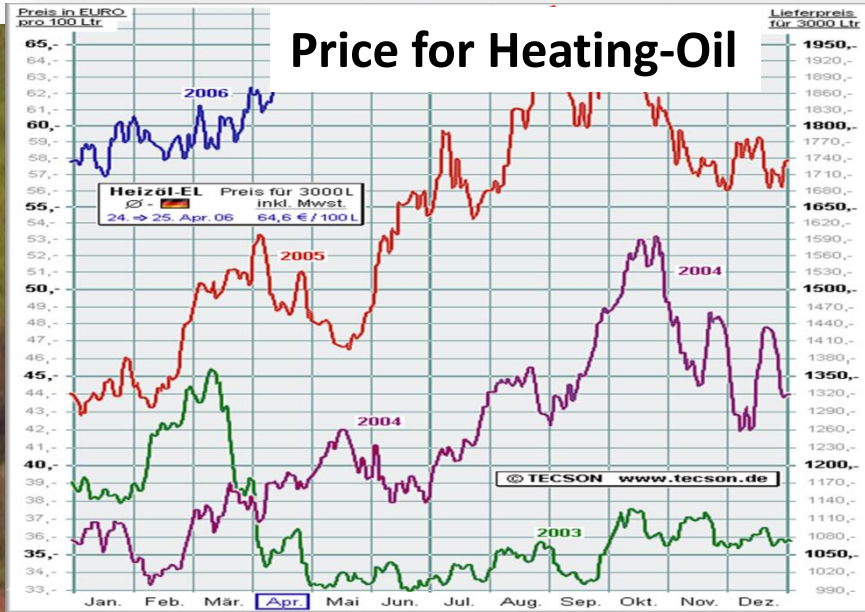

Bioenergy-Villages as an Example for Smart Activities in Villages

Hartmut Berndt - German LEADER Association

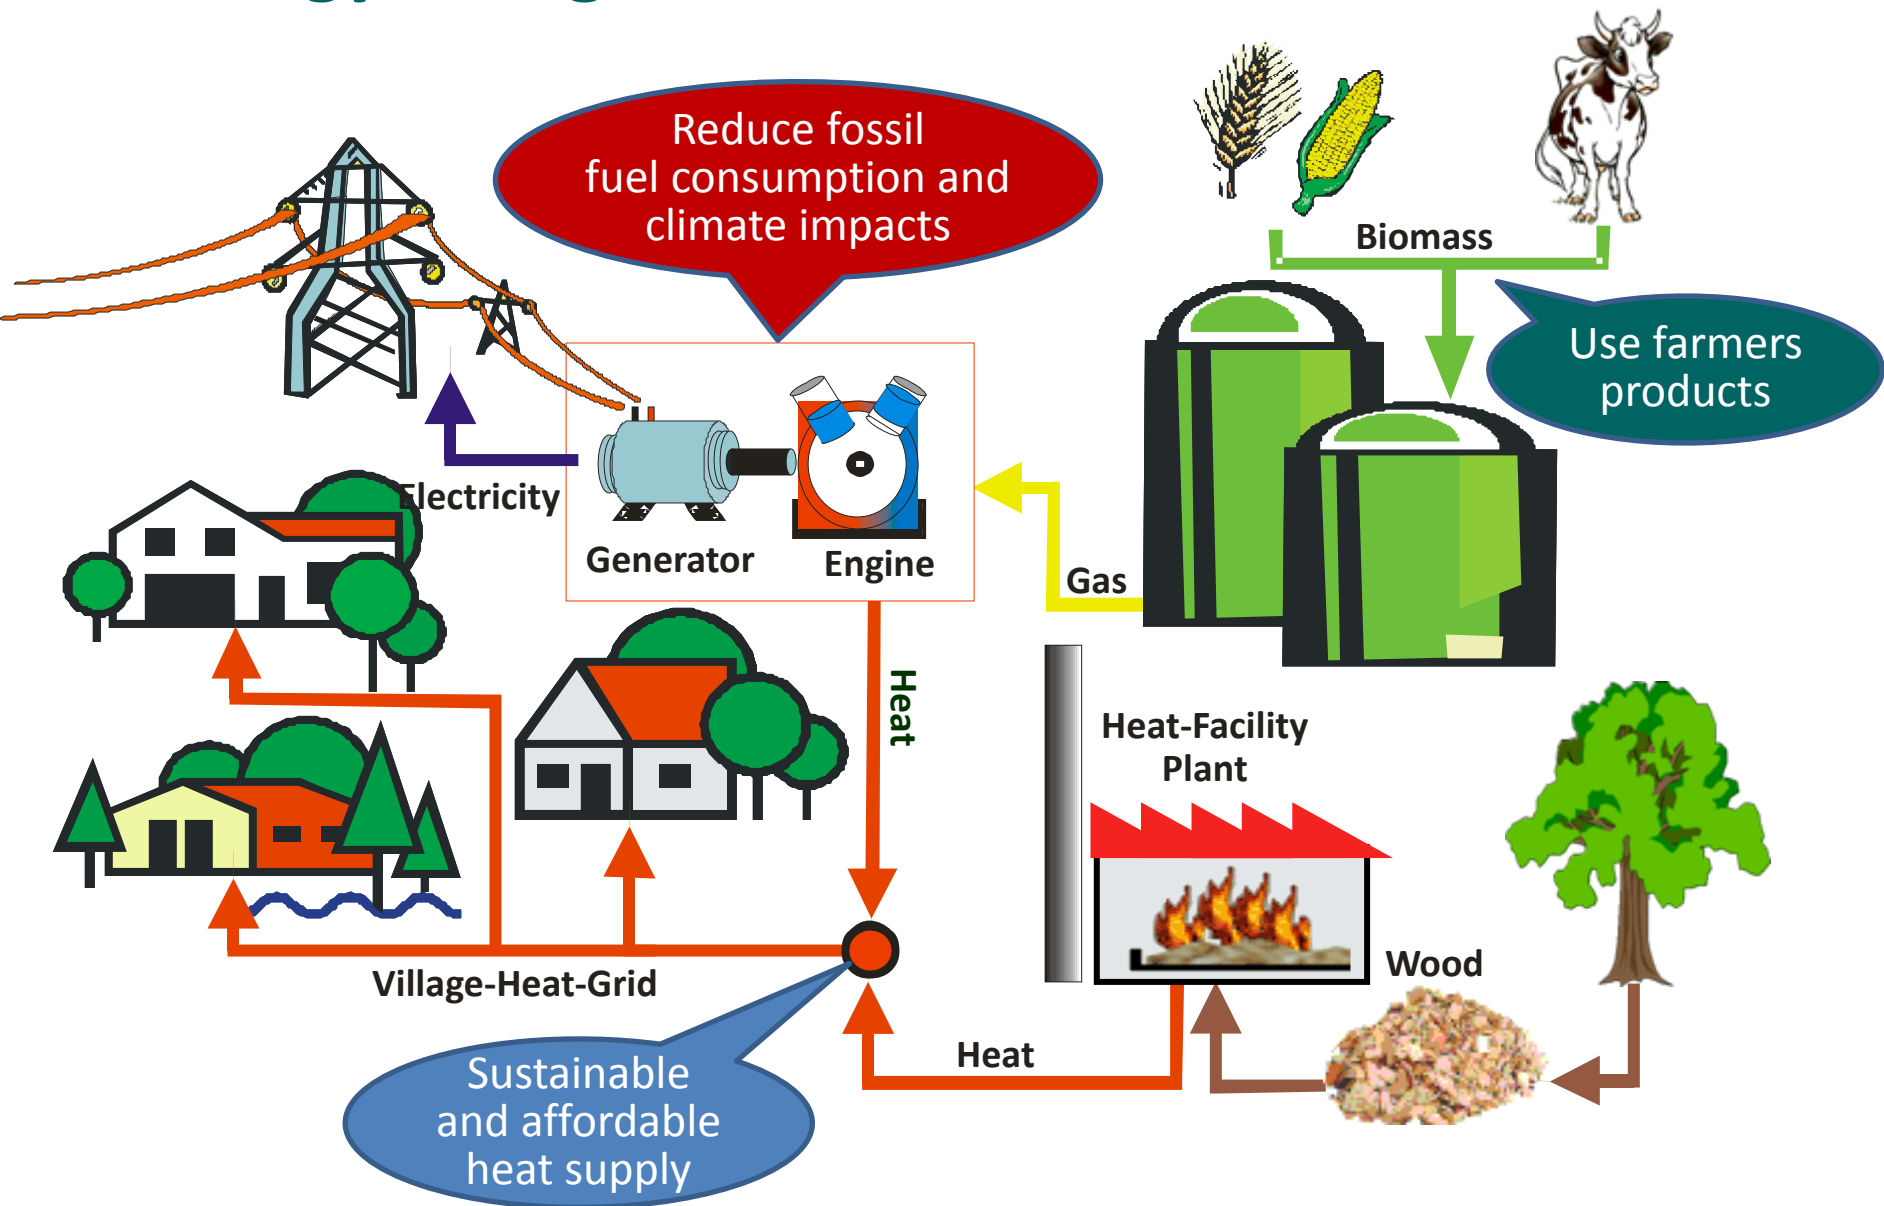

BAG LAG e.V.
German LEADER Association

3 Challenges

Smart Solution Bioenergy-Villages

Key-Factors of Bioenergy-Villages

- It is a new dimension of partnership and responsibility between the village people
- It is a “cross-over” project which brings together energy-consumers and farmers and opens chances for both groups
- It needs open-minded people, open towards new ideas and to develop new solutions for their own needs

LEADER is the method ...

- ... to find the success factors in villages and regions**
- ... to activate people and initiate processes**
- ... to bring people together and support cooperation between different sectors**
- ... to support national and transnational cooperation**

**LEADER is the key to smart
regions and villages!**

A LEADER-Interpretation of SMART

Social

Mobilizing

Attractive
