The Slovenian Rural Development Network

The Slovenian countryside is spangled with a wide variety of wonders. Natural resources, historical and cultural heritage and ground-breaking ideas, are the crucial elements for development of rural Slovenia. In order to ensure a prosperous development of rural areas, infrastructural improvements are needed, providing better working and living conditions. Economic growth, new workplaces, inclusive growth of rural communities, mutual understanding and respect are crucial factors for successful growth. Since the countryside developmental challenges are so widely intertwined, it is of major importance to raise the level of cooperation, mutual learning and coordinated action. Locally, such actions are less difficult to implement, owing to tight links among

actors. However, the voice of the countryside is much clearer and louder when it sounds in harmony. Since its founding in 2002, **The Slovenian Rural Development Network**, has been our main motive. We operate as an NGO network for the development of Slovenian rural areas, awarded with the status of an association operating in the public interest in the field of agriculture.
