Lokal Utveckling Sverige

Started as an informal network consisting of 5 LAGs and established as an organisation 2014. Since 2017 our member coverage is 100 %.

We also aim to increase the exchange of knowledge between LAGs/FLAGs on regional, national and international level.

Our mission is to strengthen and further develop the LEADER approach.

Sweden is a land of great variations, from fertile fields to high mountains, with far-stretched coasts and deep forests. Large parts of the country are sparsely populated. The CLLD serve to support interlinking structures, innovations, competitiveness, social cohesion and environmental work in a shift from being a highly industrialized country to becoming a service community.

LUS is a resource for advancing and pursuing issues concerning the LEADER approach in a national and international perspective, be representing the Swedish LAGs and FLAGs towards different organizations, authorities and decision-making bodies.
